

About Us

BlueCore Compliance is a DOT and fleet safety compliance firm founded by current and former law enforcement professionals. We support commercial carriers and logistics organizations by maintaining regulatory compliance, reducing operational risk, and ensuring they are audit-ready before federal inspectors arrive. Our solutions are trusted by safety managers, fleet owners, and drivers across the transportation industry.

Our Mission

To make safety and compliance accessible, clear, and achievable for every trucking company—from single owner-operators to full fleets. We believe compliance should never feel out of reach, and our goal is to guide, support, and empower companies to operate confidently, safely, and audit-ready every day.
